Summarize over 6 dimensional array, iteratively change how many dimensions to group over.

First, generate matrix:

# Test FF\_SUMM\_ND\_ARRAY with Random 7 Dimensional Matrix with All Parameters

Given a random seven dimensional matrix, average over the 2nd, 4th and 5th dimensionals. Show as row groups the 3, 6 and 7th dimensions, and row groups the 1st dimension. Show Coefficient of Variation only.
